SECTION II: PERFORMANCE CRITERIA

SQUAD STANDARDS & BENCHMARKS

TRAINING CONSISTENCY
(RELIABILITY)

75% 33%

TARGET

ACTUAL SQUAD AVG

Attendance baseline required for skill consolidation. The current squad average reflects the overall commitment to the training program.

SESSION INTENSITY (VOLUME)

100% 65%

TARGET

ACTUAL SQUAD AVG

Ratio of actual hours trained vs target. This drives the aerobic foundation necessary for championship performance.

COMPETITION ENGAGEMENT

5 27%

TARGET MEETS

COMPLIANCE RATE

Percentage of athletes meeting the open meet frequency targets. High compliance correlates with technical maturity under pressure.

SQUAD TECHNICAL STANDARD

350 447

COUNTY TARGET

SQUAD PEAK AVG

Current peak World Aquatics points average. This is the primary indicator of the squad's competitive ranking.

COACHING PHILOSOPHY

These criteria are not merely benchmarks but the foundation of our LTAD strategy. Athletes meeting these targets demonstrate the physiological base necessary to withstand the increased load of competitive peak-performance cycles.

INTELLIGENCE GLOSSARY

TRAINING CONSISTENCY

Percentage of expected sessions attended based on the squad's weekly target. This metric represents the psychological and physical commitment to the training program.

VOLUME % (BANKED HOURS)

Ratio of actual hours trained vs the squad's target hours. High volume correlates with aerobic threshold stability and technical consolidation.

SQUAD VELOCITY

The average change in WA Points standard over the selected period. A positive velocity indicates technical and physiological progression.

COMPLIANCE STATUS

A binary status based on meeting both training consistency thresholds AND open meet frequency targets set by the coaching staff.

COACHESEYE METHODOLOGY

The CoachesEye DNA engine utilizes multi-dimensional data points from training attendance, meet results, and club exemptions to build a comprehensive athlete performance profile. Standardization ensures that athletes are compared fairly against squad-specific benchmarks and LTAD (Long-Term Athlete Development) milestones.
